

Pet Emergency Plan

A fillable plan for dogs, cats and small pets: records, a kit list, who looks after them, and what to do if they go missing.

Pet profile

A graphic showing a white rectangular form with rounded corners, representing a 'Pet profile' section. The form has seven horizontal lines for text entry. It is layered over a light teal background that also shows the edges of other forms, suggesting a multi-page document.

11 pages · fillable or printable · for up to 4 pets · UK edition

How to use this plan

Pets depend on you for everything. If you're suddenly away from home — a hospital stay, a flood, a long power cut — this plan lets someone else step in quickly.

- Fill in one profile per pet (pages 3–6). Add a recent photo to the paper copy if you can.
- Agree an emergency carer and write it down (page 8). Tell them where this plan is kept.
- Pack the pet grab kit (page 9) and keep it with your household kit.
- Print the door card (page 11) so responders know there are animals inside.
- Review it twice a year, and whenever vaccinations, food or medicines change.

Microchip details must be kept up to date with your microchip database by law for dogs in the UK, and for cats in England. Check yours on the database's website if you've moved or changed number.
